

Experience

- Since 02/2026 **Infineon Technologies AG**, *MBA Consultant for Manufacturing Analytics*
Munich
- Integrated and structured data from multiple fab databases, establishing a consistent data foundation for scalable analytics and improved transparency in semiconductor front-end operations.
 - Analyzed manufacturing and material-consumption data to develop a statistical framework for allocating material usage to wafer-level process steps.
- 04/2022 – 12/2025 **Humboldt-Universität**, *Doctoral Researcher*
Berlin
- Secured €65K+ in research funding and led cross-functional projects in physical and materials chemistry.
 - Built one of the most advanced ultrafast fluorescence spectroscopy instruments; developed Python-based data analysis tools that are now standard in the group. Research resulted in 3 publications, 7 presentations, 2 international collaborations (US, Finland), and graduate school admission.
- 10/2021 – 12/2021 **Carl Zeiss AG**, *Corporate Development Intern*
Oberkochen
- Analyzed value streams, competitive landscapes, and customer insights in the e-waste recycling industry.
 - Led a 4-person student consulting team conducting 30+ expert interviews and delivering market-entry recommendations to senior leadership.
- 10/2018 – 09/2021 **Freie Universität & Humboldt-Universität**, *Student Assistant*
Berlin
- Tutored advanced mathematics and physical chemistry; developed tailored study guides for 100+ students.
 - Authored a *SpringerNature* textbook, adopted by over 10,000 students across Germany within one year.

Education

- Since 01/2026 **Collège des Ingénieurs**, *MBA Fellow*
Paris, Munich, Turin
- Selected for a fully funded (€80K+ stipend), multi-national MBA program in Paris, Munich, and Turin with an acceptance rate <5%; taught by faculty from Harvard, INSEAD, ETH, St. Gallen, and Sorbonne.
 - "Learning Through Action" approach: translating theory directly into practice through a company mission.
- 03/2022 – 12/2025 **Humboldt-Universität**, *Doctoral Candidate in Physical Chemistry*
Berlin
- Thesis submitted; part of the interdisciplinary graduate school "SALSA" (Analytical Sciences Adlershof).
- 02/2024 – 05/2024 **Columbia University**, *Visiting Researcher*
New York City
- Fabricated 2D quantum materials in a cleanroom environment and performed optical characterization using microscopy and Raman spectroscopy.
- 04/2017 – 02/2022 **Freie Universität**, *B.Sc. & M.Sc. in Chemistry*
Berlin
- Valedictorian in the M.Sc. (Grade: 1.0) and top 5% in the B.Sc. (Grade: 1.5).
 - Researched at *Fraunhofer Institute* (Chemical Engineering) and *Max-Planck Society* (Physical Chemistry).

Volunteering & Leadership

- 04/2019 – 12/2025 **Deputy Speaker & Web Administrator**, *JungesChemieForum (JCF) Berlin*
- Organized workshops, excursions, and conferences with 200+ representatives from science and industry.
 - Expanded forum's digital presence, increasing member engagement through targeted content marketing.
 - Served in leadership roles across scientific committees and conferences, including Head of Media and the first student member of the German Chemical Society's Heinz-Schmidkunz Award committee.
- 10/2019 – 09/2021 **Student Mentor**, *Freie Universität Berlin*
- Mentored 20+ students per semester on academic strategies, research navigation, and career development.

Achievements

- Selected Awards:** STEM Scholarship (MLP, 2025), Graduate School Grants (2023, 2024), Kekulé Fellowship (2022), Deutschlandstipendium (2020).
- Publications:** First author: ChemPhotoChem (VIP-Paper, 2025); Co-author: JACS (2026, accepted), J. Mater. Chem. C (2022); Books: *Mathe in der (Bio-)Chemie I*, SpringerNature (2024), part II in preparation.
- Certificates:** Good Manufacturing Practice, Digital Data Analysis & Statistics, Mentoring.
